PRODUCT DESCRIPTION

PROMOTION: Buy 10 switchboards and get 1 free!

DC switchboard designed for wall mounting, IP40/20 serving as an input switchboard from photovoltaic panels (to the inverter) for the entire portfolio of photovoltaic power plants. Especially when using other switchboards, also EATON BC-O-1/12-ECO.

Its advantage is its small size, the ability to "stack" with other AC switchboards next to or below each other, which makes it possible to install it even in areas where it may be problematic to find enough free space.

The switchboard is equipped with a DC surge arrester with fuse disconnectors including gPV fuses to protect the DC input to the inverter.

Suitable for combination with switchboards for the AC part of the installation fitted in EATON BC-O-1/12-ECO switchboards.
